

John Insall's legendary contributions to knee surgery were based on an academic pursuit of excellence in research and patient care.

His research endeavors encompassed biomechanics, surgical techniques and vigilant post-operative patient evaluations.

Inherent in his life's work was the importance of educating knee surgeons throughout the world.

In recognition of Dr. Insall's contribution to both the worldwide orthopaedic community and the Knee Society, The Insall Travelling Fellowship is designed to perpetuate his legacy.

### **Insall Travelling Fellows 2002 - 2010**

Mark Pagnano, M.D.	Wolfgang Fitz, M.D.
